

Derby Building Products Announces Coastal Forest Products' Charleston, SC Branch Will Distribute TandoStone®, Beach House Shake®, and TandoShake®

QUEBEC CITY, QC -- Derby Building Products announces the full line of Tando products - TandoStone®, Beach House Shake®, and TandoShake® - will be distributed by Coastal Forest Products' Charleston, South Carolina branch. The premier building materials distributor, based in New Hampshire, has expanded its Iron Woods tropical hardwoods facility into a wholesale supply business for multiple superior brands. Coastal will distribute Tando products in a 150-mile radius from Wilmington, NC to all of South Carolina.

"We're excited to partner with Derby on these innovative exterior products, especially with shingles so prevalent in this market," said Wes Robichaud, Coastal - SC's Sales Manager. "With authentic realism and labor savings, the new technology behind Beach House Shake as a composite shingle makes it the finest product on the market today."

Michael Morris, VP of Sales, Derby Building Products noted that Coastal Forest Products is known for service and bringing innovative products to market. "Tando's partnership with Coastal has a track record of performance throughout the northeast region and we couldn't be more excited to expand on that partnership with Coastal's South Carolina branch."

Beach House Shake, the authentic composite shingle, delivers the charm and beauty of natural cedar. Down to the last detail, Beach House Shake mimics the natural color variations, genuine saw cuts, and detailed grain patterns of real cedar. Its architecturally precise 5" re-squared and rebuted lines create individual shingles as unique as they are beautiful. And with the proven performance and durability of a composite, Beach House Shake stays looking like the day it was installed for years.

TandoStone, the #1 brand of composite stone, is preferred by siding installers for its lightweight and easy, one-person installation. It allows a siding contractor to install a stone product without the need for a mason, scaffolds, or adhesives which increases speed, efficiency, and cleanliness on the jobsite.
